

HIGH PRESSURE TEST PUMP FOR DRY COLUMNS

<https://www.securhit.com/en/fire-hoses-and-accessories/180-pompe-d-epreuve-thermique-pour-colonnes-seches.html>

High thermal pressure test pump for the control of dry columns in static pressure

Description

Portable test motor pump for dry columns. Honda thermal engine with manual start.
Quick discharge couplings. Flow 25 l / min
Pressure from 0 to 25 bars. Water supply from the network or from the tank
Tubular type frame. Sizes : 670 x 450 x 460 mm Weight : 36 kg
Supplied with 3m discharge hose with quick couplings.

Caractéristiques

- Dimensions : 670 x 450 x 460 mm
- Weight : 36 kg
- Flow : 25 l / min
- Pressure : 0 à 25 bars
