HIGH PRESSURE ELECTRIC TEST PUMP FOR DRY COLUMNS

https://www.securhit.com/en/fire-hoses-and-accessories/181-pompe-d-epreuve-electrique-pour-colonnes-seches.html

Electric high pressure test pump for the control of dry columns in static pressure

Description

Portable test motor pump for dry columns. Single-phase 240V-50Hz electric motor.
With manual start. Quick discharge couplings. Flow 25 l / min.
Pressure from 0 to 25 bars. Water supply from the network or from the tank
Tubular type frame. Sizes : 670 x 450 x 460 mm
Supplied with 3m discharge hose with quick couplings

Caractéristiques

- Dimensions : 670 x 450 x 460 mm
- Weight : 36 kg
- Flow : 25 l / min
- Pressure : 0 à 25 bars
