

WATER-FILIALBLE BARIACTRIC SUIT

<https://www.securhit.com/en/rescue-mannequins/195-combinaison-remplissable-pour-mannequin-d-entrainement.html>

Allow to covert a standard manikin into a bariatric one

Description

This suit was thought and design to use a bariatric manikin without efforts
This allows trainers to place a manikin in situ before adding the weight by filling the suit with water.
An additional weight up to 150 kg can be added to the manikin
This solution is advantageous because the bariatric manikin can be set up by one person and placed in small spaces.
Made from an extremely high specification trilaminar of Cordura, butyl and polyester fabric.
Weighing 5 kg, it is carryable by one person
Delivered with carry holdall, all adaptors and water flow meter
This water-fillable bariatric suit allows the training teams to convert a standard manikin into a bariatric one by adding up to 150 kg.

Caractéristiques
