

MOUNTAIN SEARCH AND RESCUE TRAINING MANIKIN

<https://www.securhit.com/en/rescue-mannequins/198-mannequin-d-entrainement-au-sauvetage-en-montagne.html>

Flexible rescue training manikins for avalanches victims' research

Description

Specially designed to be transported to locations which are difficult to access and also suitable for use by mountain search and rescue professionals.

Constructed from the same flame retardant material used in Police ballistic/stab vests. The chest is empty to allow to fill it and the legs are weighted.

Recco® reflectors built in to the manikin are searchable by transceiver.

Light weight at only 11 kg for ease of transportation in the supplied backpack - the manikin can be fold in two.

Filled with foam to give the bulk and firmness of a body and demonstrating a "spongy resistance" when probing for increased realism.

Secure pockets to protect an electronic transceiver. water repellent and non absorbent material to reduce drying time after exercises.

Size: 1.80 m - Weight: 11 kg

Those manikins have a special conception allowing an easy backpack, equipped of Recco® reflectors for buried victims research training.

Options: thermal vest equipped with heating pockets for spot training thanks to thermal camera - two replacement heating pockets - 10 kg ou 20 kg weighted vest - black hood for water adult or kid manikin, legs protection - carrying bag - replacement overall for kid, teen, adult and water adult - replacement boots for adult of kid manikin - 4 velcro straps for boots fixation
