

CONFINED SPACE TRAINING MANIKIN

<https://www.securhit.com/en/rescue-mannequins/201-mannequin-d-entrainement-au-sauvetage-en-espaces-confines-50-kg.html>

Training manikin for confined space

Description

These manikins split into smaller part with no individual component weighing more than 25 kg. Constructed from the same flame retardant material used in Police ballistic/stab vest, offering 4x the strength and abrasion resistance.

Due to its detachable limbs it is easier to position in rescue scenario, especially for training such as car collision or research after earthquake.

Tough enough to withstand being buried under concrete or steel lintels, driven over by a 4 x 4 vehicle, or dropped from a second floor window without damage.

Water repellent material, making it suitable for wet or foul scenarios such as HAZMAT/CBRN.

Soft body joints to eliminate the risk of pinch welts and bruising, common injuries when using plastic bodied manikins.

Options: thermal vest equipped with heating pockets for spot training thanks to thermal camera - two replacement heating pockets - 10 kg ou 20 kg weighted vest - black hood for water adult or kid manikin, legs protection - carrying bag - replacement overall for kid, teen, adult and water adult - replacement boots for adult of kid manikin - 4 velcro straps for boots fixation

Caractéristiques

- Weight : 50 kg

- Specificity : Grâce à ses parties détachables, le mannequin peut être facilement placé dans des endroits avec peu d'espace pour créer des scénarios réalistes tels que une collision de voiture ou recherches après effondrements.

- Height : 1.80 m
