

Ligature training manikin

<https://www.securhit.com/en/mannequins-de-sauvetage/202-mannequin-d-entrainement-victime-de-pendaison.html> Flexible dummy for ligature training rescue

Description

This manikin has anatomical landmarks including the sternum, rib cage, and substernal notch for a more realistic approach.

Constructed from the same flame retardant material used in Police ballistic/stab vests, offering 4 times more resistance to abrasion.

High density polypropylene webbing 25 mm rated to 207 kg and 50 mm rated to 440 kg

The manikin has also teeth, uvula, vocal cords, glottis, epiglottis, larynx, arytenoid, cartilage, trachea, oesophagus, inflatable lungs and stomach. It allows for placement of a nasogastric tube.

Realistic knee joints promoting correct manual handling techniques including preservation of the spine shape.

Size: 1.80 m - Weight: 25 kg.

Options: thermal vest equipped with heating pockets for spot training thanks to thermal camera - two replacement heating pockets - 10 kg or 20 kg weighted vest - black hood for water adult or kid manikin, legs protection - carrying bag - replacement overall for kid, teen, adult and water adult - replacement boots for adult or kid manikin - 4 velcro straps for boots fixation

The ligature training manikin allows to train the teams over risky intervention such as suicide.
