

CANYON BAG ALCANADRE GUIDE 45

<https://www.securhit.com/en/canyon/208-sac-canyon-alcanadre-guide-45.html> Comfortable and ergonomic bag for canyoning

Description

ALCANADRE GUIDE is a 45-liter bag designed for independent practitioners and canyoning supervisors. During the approach walks or while progressing, its comfort is optimal, thanks to the numerous padding. Its multiple perforations easily evacuate water. It has coloured rings for the ends of the rope, a removable belt and buckles on each of its shoulder straps to leave the bag quickly in case of rescue. Inside, two compartments give you direct access to your canister and rope, a patch pocket can hold your rescue gear and a mesh pocket can be used to store small gear. Its construction and reinforced top handle make it very durable.

Caractéristiques
