

TERRADAPTOR MAST - TRIPOD KIT

<https://www.securhit.com/en/winches-tripods-and-fall-arrest-systems/218-mat-de-deport-terradaptor-kit-tripode.html>

Portable and versatile anchoring system

Description

The TerraAdaptor derives its remarkable versatility from the unique design of its head, which allows the angle of each leg to be adjusted independently. This allows the head to remain level even when the system is installed on uneven and uneven ground or in asymmetrical configurations, which is often necessary in confined or complex spaces.

The Space Station enhances the TerraAdaptor's hanging capacity. Simply mount it on the head to increase the number and variety of fixtures in the system. Separate the two modules to create a sturdy monopod or attach it to a mid-tube to serve as a targeted anchor point. The Harken Lokhead kit easily attaches to the TerraAdaptor legs.

The quick release is ideal for attaching pulleys or other equipment to facilitate anchoring and other attachments. It allows you to install an auxiliary anchor point before, during or after the system is assembled.

The rope sheave is specifically designed to accommodate the most common rope winches.

The tie-down rings are designed to provide multiple attachment points to stabilize the tripod. You can install as many as you like, anywhere along the perforated tubes, oriented as you see fit.

This device should only be used for fall protection and not as lifting equipment.

CE, NFPA certification

Caractéristiques

- Weight : 40 kg
- Height : jusqu'à 2.74 m
- Maximum breaking load : 36 kN
