

ISOTHERMAL BLANKET

<https://www.securhit.com/en/first-aid/224-couverture-isothermique.html>

Sterile isothermal blanket

Description

When it is necessary to protect the victim of a burn or if there is a risk of infection, the sterile survival blanket is necessary!

- Helps maintain body temperature to combat hypothermia.
- Individually wrapped.
- Can be used easily in the same way as the YLEA survival blanket.
- Its dimensions allow it to completely envelop the victim or patient.
- The gold side facing outwards keeps the victim's body temperature.
- The golden side facing inwards prevents the ambient temperature from increasing the body heat.

Caractéristiques

- Dimensions : 1,60 x 2,10 m
