SYM 40 STRAINER WITH POLYETHYLENE BASKET

https://www.securhit.com/en/valve-fittings/231-crepine-sym-40-avec-panier-polyethylene.html

Suction strainer for pumps and pump units

Description

The suction strainer with polyethylene basket is designed for water filtration on the suction lines of pumps and pump units. This simple suction strainer helps retain impurities and particles present in the water, protecting the suction circuit and pumping equipment.
Manufactured from aluminium, it is fitted with a polyethylene basket, providing a lightweight and practical solution for water suction operations. The strainer can be fitted with symmetric firefighting couplings (SYM) or Storz couplings, allowing it to be adapted to different connection systems used on pumping equipment and firefighting installations.
Available in several diameters, it is suitable for different suction line configurations.

Technical Specifications
- Type: Simple suction strainer
- Application: Suction line filtration
- Use: Pumps and pump units
- Function: Filtration and protection of the suction circuit
- Strainer material: Aluminium
- Basket: Polyethylene
- Compatible connections: Symmetric firefighting couplings (SYM) or Storz couplings
- Available diameters: 40, 65 and 100 mm

Caractéristiques

- Materials : Aluminium avec panier en polyéthylène
- Available diameter : 40, 65 et 100 mm
