

GYRO 4 MULTI-ANCHOR SWIVEL

<https://www.securhit.com/en/mousquetons-et-connecteurs/243-emerillon-multi-ancrage-gyro-4.html> Gyro 4 multi-anchor swivel

Description

Revolutionary three-dimensional rotary multi-anchorage system with four self-orienting connection points. The system guarantees countless connection possibilities between elements that require a high degree of freedom of movement, making the use of Gyro4 advantageous even in the most complex configurations. Open structure that prevents dirt deposits and facilitates inspection.

Carbon steel flanges with double anti-corrosion coating, stainless steel connection points.

Four silicone anti-rotation rings included in the package, which can be installed at the user's discretion.

Working (3 kN) and breaking (26 kN) loads double when the two main structures are side by side horizontally.

Caractéristiques

- Weight : 265 g
- Resistance : 26 kN
