

COMPACT FAN ON BATTERY EX50Li WITH CARRYING STRAP / WITHOUT BATTERY

<https://www.securhit.com/en/ventilation/287-ventilateur-compact-sur-batterie-ex50li-avec-sangle-de-portage-sans-batterie.html>

Compact fan with long autonomy

Description

The compact battery-powered EX50Li fan is powered by a rechargeable and replaceable battery pack, giving it a very long runtime of up to 90 minutes.

Powershroud technology combines the blower effect of the impeller with the focused air mass effect of the cone, guided by the stator grille.

Thanks to this technology, the fan can be placed further away from the entrances and thus facilitate the traffic of extinguishing personnel and equipment. The precision and concentration of the air stream also allows the use of smaller openings.

LEDs are integrated on the fan to illuminate the interventions at night.

It is waterproof and the motor has no brushes. The fan is complemented by accessories such as a vehicle mounting kit, ducting etc.

It can be used for smoke rejection or during rescue operations in confined spaces.

The EX50Li positive pressure ventilator has a 3 year warranty, provides exceptional autonomy and is battery operated.

CE certified and flow measurements certified according to AMCA method.

Caractéristiques

- Dimensions : 56 x 53 x 30 cm
- Weight without battery : 20 kg
