Atex EX1400R rechargeable projector

Description

This ATEX rechargeable self-contained projector is a rechargeable battery-powered projector for use in the toughest conditions (petrochemicals, wastewater treatment, etc.).

With a 10-hour runtime and 1400 Lumens of light output, it recharges in just 5 hours.

Weighing just 5 kg and with IP66 and IK08 ratings, this projector is easy to handle, lightweight, robust and highly resistant to bad weather.

The projector can be used connected to the mains supply.

Certified ATEX zones 1/21, 2/22
