

FIREHEAD AXE WITH FIBRE GRIP AND THROAT

<https://www.securhit.com/en/outillage-de-forcement/291-hache-firehead-emmanchee-fibre-avec-gorge.html> US Firehead firefighters axe

Description

Single-edged flat-head axe with curved handle and concentrated cutting edge.

Used for all kinds of fire-fighting applications: cutting, striking, blocking a door, etc.

Forged steel head made in the USA, with fully polished, hand-sharpened body and 12.5 cm cutting edge.

Heat-treated cutting edge producing a fine-grained appearance, Rockwell hardness value 45-55 for optimum strength and wear resistance, for use in complete safety.

Enlarged striking surface at the rear, cutting edge designed to concentrate effort where it's needed for a deep, fast, solid cut.

Body coated with red enamel paint and lacquered tip to prevent corrosion.
