Professional Halligator forcible entry tool for firefighters

## Description

Designed for firefighters and rescue professionals, this Halligator forcible entry tool is a heavy-duty piece of equipment built for prying, breaching, and emergency access operations. Its one-piece forged steel construction ensures maximum strength, durability, and reliability in the most demanding intervention environments.

Key features
- One-piece monobloc forged steel construction for maximum strength
- Ultra-high-strength steel alloy with heat-treated working ends
- Optimized pick, flat head, and pry bar design for efficient force transfer
- Wide working surfaces and tapered points for improved penetration and leverage
- Two integrated eyelets for shoulder carry with strap or custom sling
- Powder-coated electrostatic finish for excellent corrosion resistance
- Compatible with the US Firehead axe for combined use in operations

Technical specifications
- Application: Forcible entry, prying, rescue, firefighting operations
- Length: 76 cm
- Weight: 4.7 kg
- Material: One-piece high-strength steel
- Treatment: Heat-treated working ends
- Finish: Powder-coated anti-corrosion electrostatic coating
- Transport: Two integrated eyelets for shoulder carry

## Caractéristiques

- Weight : 4.7 kg
- Length : 76 cm
