Floating pump with remote control and fittings

Description

The Hydra Remote float pump is equipped with remote start via a remote control or electrically through a button located on its tank, which allows for easy operation from the shore or edge. Its maximum flow rate of 1180 l/min and a maximum pressure of 4.5 bars offer great versatility. It is ideal for pumping water from natural sources. It is also an effective aid for firefighters during operations where water pumping is necessary, or for filling tanks, draining flooded areas, or extinguishing fires.

The pump is made of aluminum alloy, and the float is made of highly resistant rotomolded polyethylene.

It is equipped with a 4-stroke Briggs and Stratton 6.5 HP engine and has 4 large carrying handles, making it very ergonomic.

The floating water pump comes with a DSP 65 connection and can also be supplied with a simple threading or other types of connections upon request.

DESCRIPTION

New construction for improved performance.

Remote start via remote control or electrically with an integrated control panel on the tank.

Integrated fuel tank with a volume of 6L.

Operating time of over 3 hours.

New ergonomic design.

Easy handling thanks to 4 handles.

Compact shape and dimensions.

Ergonomic float for better stability.

FEATURES

Max flow rate: 1180 l/min

Max head: 45 meters

Starting system: Manual / Electric / Remote

Weight: 32 Kg empty / 37.5 kg full

Dimensions: 786 x 595 x 392 mm

Flow at 0.5 bar: 1075 l/min

Flow at 1 bar: 1014 l/min

Flow at 3 bar: 380 l/min

Flow at 4 bar: 150 l/min

Caractéristiques

- Dimensions : 786 x 595 x 392 mm
- Autonomy : 3 heures
- Dry weight : 29 kg
- tank volume : 6 litres
- Fully loaded weight : 32 kg
