

LIFELINE 100 M. IN BAG

<https://www.securhit.com/en/sauvetage/307-ligne-de-sauvetage-beachline-100-m-en-sac.html> 100 m lifeline in bag

Description

By-pass bag with opening at each end closed by tanka cord.

Can be tied at either end.

Made of breathable mesh fabric to allow the rope to dry, with strong lined seams.

Equipped with two inner webbing loops for tying the rope. An outer webbing loop for hanging the bag.

Supplied with a strap for towing a victim.

The bag is very durable, allowing a 100 metre rescue line to be easily carried and stored.

Includes 4mm high visibility floating rescue line, HMPE dyneema core and 16-ply polypropylene sheath.

Caractéristiques

- Dimensions of the bag : 44 x 22 x 28 cm
