Galaxy Pro 6K Rechargeable LED Work Light □ Portable High Power Lighting

Description

The Galaxy Pro 6K rechargeable work light is a high-performance portable LED floodlight designed to provide powerful and reliable lighting for operations, safety tasks and demanding environments. Compact, durable and fully autonomous thanks to its lithium battery, it offers an ideal mobile lighting solution when rapid and efficient area illumination is required. With adjustable light output up to 6,000 lumens, the Galaxy Pro 6K allows users to adapt lighting levels according to operational needs while optimizing battery life.

Key advantages of the Galaxy Pro 6K rechargeable work light

- High light output: from 250 to 6,000 lumens
- 3 lighting modes: 100%, 50% and 25% (dimnable)
- Long runtime: from 2h30 to 60 hours
- Durable polycarbonate housing
- IP54 protection rating: resistant to dust and water splashes
- Integrated carry handle for easy transport High-performance lithium battery
- Silent operation with no maintenance required
- Suitable for confined spaces and low-voltage safety environments

Available accessories

To adapt to different operational configurations, several accessories are available:

- Magnetic mounting kit for fixing on metal surfaces (vehicles, structures, equipment)
- Telescopic tripod for 1 floodlight - height up to 1.70 m
- Telescopic tripod for 2 floodlights - height up to 3.50 m
- 12V vehicle cigarette lighter charger

Technical specifications

- Beam distance: up to 30 m at full power
- Battery: Li-ion 7.4V □ 13.2 Ah
- Charging time: approx. 8 hours
- 230V AC charger included, stored in an integrated compartment
- Can be used while connected to the main power supply

- Warranty: 2 years

Caractéristiques

- Dimensions : 310 x 350 x 285 mm

- Weight : 1.5 kg
