

ROLLER COASTER ROPE PROTECTION

<https://www.securhit.com/en/ropes-and-cords/313-protection-de-corde-roller-coaster.html>

Reversible protection on bearings for moving ropes

Description

The ROLLER COASTER is designed to protect a moving rope from a friction zone. Reversible with two differently shaped sides, it can be adapted to a flat surface as well as to an angular area. Multiple connection holes allow the use of different types of fixings. The connection of several modules is possible, in order to better adapt to the different situations on the ground.

Caractéristiques

- Weight : 470 g
- Materials : Acier et aluminium
