

Apollo LED CO₂ TRAINING FIIRE EXTINGUISHER 2L

<https://www.securhit.com/en/training-accessories/33-extincteur-de-formation-apollo-co-2l.html>

Fire extinguisher for training and education

Description

This practice extinguisher imitates the operation of a CO₂ extinguisher. It can be used for extinguishing training for liquid fires and fires in live equipment. The Apollo LED CO₂ Drill Extinguisher is compact. Because the exercise model is heavy, the exercise extinguisher will feel like a real extinguisher. Dry ice extinguishers are suitable for extinguishing liquid fires and electronic equipment fires. This makes the FireWare Apollo LED CO₂ Drill Extinguisher 2L ideal for training for firefighting in a server room or data center. Like a real CO₂ extinguisher, the Apollo LED Drill Extinguisher leaves no traces of water, foam or powder.

Caractéristiques

- Power : Batterie
- Weight : 6.84 kg
- Content : 2L
- Language : Français (sur demande pour une autre langue)
- Charging time : 2 heures
