Electronic blinding masks smoke simulator kit

Description

The participants wear a special ski mask equipped with an LCD screen. This screen can become more or less transparent at the touch of a button. This way 6 different smoke thicknesses can be simulated. With the Nebula the participant has the smoke experience and the instructor has a clear view, providing room for optimal feedback. The Nebula also has a random mode, in which the mask gives an irregular smoke pattern with varying visibility.

With the included remote control, the instructor can control up to 4 groups of masks. Each group can consist of 4 masks. Therefore, you can control up to 16 masks with one remote control. If someone panics, just press the panic button and you'll have full visibility.

The mask can be worn directly over the face or over a breathing mask. All electronics are neatly concealed in the housing of the mask: no loose wires or loose boxes, which makes it very safe experience! You can charge the mask via a mini USB connection.

There are two Nebula AR mask sets available:

The MAXI (025-021-004) set consists of:

- 1 instructor unit (remote control)
- 4 Nebula AR Smoke Simulation masks
- 1 charging hub with 5 charging cables
- Instructions for use
- All neatly packed in a box with foam interior

The MINI (025-021-003) set consists of:

- 1 instructor unit (remote control)
- 2 Nebula AR Smoke Simulation masks
- 1 charging hub with 3 charging cables
- Instructions for use
- All neatly packed in a box with foam interior

Caractéristiques

- Dimensions : 20 x 9 x 9 cm
- Weight : 0,16 kg
