Electronic exercise gas cylinder

Description

The Electronic Drill Gas Bottle simulates a whistling gas leak. A hissing sound comes from the built-in speakers and can be adjusted with the gas valve. The gas bottle works with a built-in battery, so there are no wires. The effect is therefore very realistic. With a full battery, the cylinder can run for 6 hours. The device has a simple start-up and comes with a charger.

Caractéristiques

- Weight : 7 kg
- Tank capacity : 6L
- Material : Acier
