Helicopter loading bag

Description

Two-piece construction: sturdy bottom outer section with wide corners to protect the structure. Inner part is 6mm thick, the bases are attached through the bottom of the bag and through the straps by steel bolts with Nylock nuts.

Equipped with 6 carrying handles, including a 48mm x 3m strap for securing or sliding attached to one end with leather closures that can be stored in a zippered pocket when not in use.

Two heavy duty 48mm straps that extend 550mm above the top of the bag. Each strap is double layered for added strength.

Reinforcement inserted between each strap to minimize bag rotation during transport. Each strap has a triple action karabiner, large steel opening.

Materials: 10 mm plastozote foam, P200 inner lining, PC350 base, resistant fiberglass base, 8 mm resistant zip, 48 mm thick strap with 26 kN resistance.

Available in two models: Small and Standard.
