Non-Toxic White Smoke Grenade - Electric Ignition for Fire Services

Description

The non-toxic white smoke grenade with electric ignition produces dense, clean, and residue-free smoke, ideal for fire drills, firefighter training, chemical hazard exercises, and air flow visualization. It is also suitable for ventilation testing and smoke control system inspections in buildings, tunnels, parking garages, and industrial facilities. This professional smoke grenade is safe for personnel and the environment, and will not damage electronic equipment such as computers, cameras, or video systems.

Technical Specifications

- Ignition: Electric
- Smoke Color: White, clean, residue-free, non-toxic
- Size: 75 x 260 mm
- Safety: Safe for personnel and electrical equipment

Available Models

- 300 m³ □ duration 1 min 30 sec
- 500 m³ □ duration 3 min
- 1000 m³ □ duration 6 min
- 15,000 m³ □ duration 6□7 min

Applications

- Fire drills and simulations
- Firefighter and emergency response team training
- Chemical hazard and NRBC exercises

Caractéristiques

- Size : 75 x 260 mm
