Dog rescue training manikin

Description

The dog manikins are perfect for training with other teams and even multi-agency exercises involving helicopters (air rescue), the Coastguard and Mountain Rescue organisations.

They are constructed in waterproof Polyester, a material which typically has 4 times the strength and abrasion resistance of canvas or P.V.C.

Constructed of the same flame retardant Polyester (conforms to BS EN ISO 15025:2002, OEKO-TEX® Standard 100 and ISO 17050-1) used in Police ballistic/stab vests.

Made from waterproof material, this means they can be easily cleaned and dried.

Tough enough to bury under rubble and rockfall, drive over with a vehicle or drop from 2nd-floor window with no damage.

Note: These manikins will withstand temperatures up to 100°C but should not be exposed to prolonged high temperatures or naked flames. It should not be used in deep water as it will sink.

Caractéristiques

- Weight : 10, 20 et 25 kg
