Description

Our Full Body Airway Management manikin is supplied with a SimuAids Adult Airway Management Torso. The torso is not fixed and can easily be removed for cleaning. A padded jacket is supplied to protect the torso and to aid installation and removal from the carcass.

Now constructed in Polyester: conforms to BS EN ISO 6330), OEKO-TEX® Standard 100 - the new material is tough, safe to handle and very easy to clean.

Adult sized at 1.8m for realistic training.

Supplied with replaceable, washable protective overalls.

Supplied in a tough storage/carrying holdall, making storing and handling the manikin far easier.

The torso features anatomical landmarks including the sternum, rib cage, and substernal notch. The torso also contains teeth, uvula, vocal cords, glottis, epiglottis, larynx, arytenoid cartilage, trachea, oesophagus, and inflatable lungs and stomach whilst allowing nasogastric tube placement.

Supplied complete with protective overall.

Also available as a 20kg manikin with an IV arm for cannulation.
