Cardiopulmonary resuscitation training manikin

## Description

Our Full Body CPR manikin comes complete with a Simulaids Brad torso. However, some other torso may fit.

Torsos are not fixed and can easily be removed for cleaning. A padded jacket is supplied to protect the torso and to aid installation and removal from the carcass.

Now constructed in Polyester: conforms to BS EN ISO 6330), OEKO-TEX® Standard 100 - the new material is tough, safe to handle and very easy to clean.

Adult sized at 1.8m for realistic training.

These manikins totally eliminate the risk of the pinching associated with the joints of the plastic full-bodied manikins.

Supplied with replaceable, washable protective overalls.

Supplied in a tough storage/carrying holdall, making storing and handling the manikin far easier.

Supplied in 2 weights (with torso fitted): 20 & 50Kg.

Supplied complete with carrying/storage holdall and protective overall.

## Caractéristiques
