First aid fire hose

Description

The Stabilostar-Super-G has a polyester core reinforced with an anti-crushing spiral and an internal EPDM coating.
Its external coating "Ribs PU" gives it an excellent resistance to the hard conditions of use of first aid, to abrasion, to chemical products and allows its use in sea water.
The fluorescent orange color allows a very good visibility and despite its extreme lightness, this hose can be used in high pressure.
Working pressure in Dn 25 mm: 40 bar.
Bursting pressure in Dn 25 mm: 100 bar.

The Stabilostar-Super-G hose is CE EN 1947 / Category II / Type B / Class 3 approved.

The hose is available in:
Dn 25 / 2 m with GFR fittings
Dn 25 / 20 m with GFR fittings
Dn25 / 40 m with GFR fittings
