Weepflex Leaky Hose Fluorescent Yellow Forest Fire Hose

Description

The Weepflex leaky hose in fluorescent yellow is specifically designed for forest and bush fire fighting operations. With its double EPDM internal coating and 100% high-strength polyester construction with reinforced circular weaving, this hose offers excellent durability and abrasion resistance.
The high-quality EPDM inner lining provides optimal resistance to flames and embers, while the fluorescent yellow color ensures maximum visibility for rapid deployment during emergency interventions. Lightweight, flexible, and easy to handle, the hose features a micro-perforated surface that allows complete area wetting within 5 minutes at only 3 bar. No water spray occurs up to a working pressure of 12 bar, minimizing friction losses and ensuring efficient operation in the field.

Technical Specifications
- Optimal visibility: Fluorescent yellow for quick identification
- Construction: 100% high-strength polyester with reinforced circular weaving
- Inner lining: High-quality EPDM, resistant to flames and embers
- Lightweight and flexible: Easy to handle and deploy
- Abrasion resistance: Ideal for rough terrain
- Perforated surface: Complete wetting in 5 minutes at 3 bar
- Low friction loss: No spray up to 12 bar working pressure
- Use: Self-wetting hose for forest and bush fire fighting

Caractéristiques

- Coloris : Jaune fluo
