The NSR-1516 rechargeable LED area light

Description

The NSR-1516 rechargeable LED area light with magnetic base is perfect when portability is important. This area light cranks out an impressive 2,500 lumens of light on high and 1,250 lumens on low using a single toggle switch. The housing is constructed from cast aluminum and the multi-fin heat sink design keeps the fixture cool to the touch.
The light can be swiveled independently allowing the user to position the fixture exactly wherever light is needed and the heavy-duty integrated magnetic base allows the light to be attached to most metal surfaces for hands-free operation. The area light includes an adjustable handle, and AC and DC power supplies.
The 6C model is supplied with a 2 meter tripod.
