Description

The rechargeable Atex XPR-5580G spotlight offers focused, diffuse, and combined lighting, ideal for explosive atmospheres. It's especially suited for industrial settings or firefighter use. The focused setting provides three levels of brightness at 210, 100, and 30 lumens, with a reach of 384 meters. Diffuse lighting allows visibility through smoke, featuring three brightness levels of 200, 100, and a "survival mode" at 30 lumens, ensuring ample light for emergencies with a lifespan of 65 hours. The combined lighting mode enables users to see distant objects and the ground ahead during movement or work.

Powered by a rechargeable lithium-ion battery, the XPR-5580G's battery life can be increased by 40 hours with two additional lithium-ion batteries.
