Diffuser valve

Description

D.M.A. mixed diffusion valves with three positions: closed, diffused jet, straight jet. They are designed to be screwed onto the end of a lance barrel, offering a lightweight, high-performance lance with an excellent compromise.
D.M.A. D.H.T. (Diffuseur Haute Tension) valves with two positions: closed and diffused jet. They can be used on live electrical fires.

Caractéristiques

- Dimensions : 183 x 107 x 113 mm
- Weight : 0.9 Kg
