KOMMANDO Forest Fire Division with Check Valve - Fast, Reliable & Efficient

Description

The KOMMANDO forest fire division with check valve is designed for forest firefighting operations. It features 3 outlets and quick 1/4-turn valves, allowing for rapid deployment and efficient water distribution during emergency interventions.
Made from A-S7G 06 Y33 aluminum alloy, this division is lightweight, durable, and resistant, built to withstand the toughest conditions.
The integrated check valve prevents backflow, ensuring safe and reliable operation. The full-bore spherical ball design minimizes pressure loss, maximizing flow and operational efficiency on the field.

Key Features
- Type: KOMMANDO forest fire division with check valve
-Outlets: 3 outlets with 1/4-turn valves
- Material: Aluminum A-S7G 06 Y33
- Check valve: Included
- Performance: Minimal pressure loss due to full-bore spherical ball
- Usage: Ideal for rapid deployment in forest firefighting operations

The KOMMANDO check valve division is the perfect choice for wildland firefighters and emergency response teams, offering speed, safety, and efficiency in all conditions.

Caractéristiques

- Material : Alliage d'aluminium
- Pression nominale : PN16

- Traitement de surface : peinture polyester
