### Description

The mobile foam production unit is available in 100-liter or 150-liter versions. It comprises a yellow-tinted polyethylene tank mounted on a chassis fitted with two 400 mm solid wheels and two swivel castors with locking devices. The mobile foam unit comes complete with accessories (as described in the designation column of the table below): 200 or 400 L/min proportioner with suction hose, 20-meter long flexible fire hose with 45 or 70 diameter, 200 or 400 L/min low or medium expansion foam nozzle (depending on model). Various connection options are available.
