

## MONITOR TRAILER UNIT 2000L/MIN WITH FOAM TANK 200L

<https://www.securhit.com/en/production-mousse/446-unite-tractable-de-mousse-200l-avec-lance-monitor-2000l-min.html> Trailer with foam tank 200L and monitor 2000 l/min

### Description

The Foam Tractable Unit is an effective solution for firefighting. Designed to meet the needs of emergency and fire safety professionals, this unit combines high performance, ease of use, and durability.

Single Axle Tractable Chassis: Easily maneuverable and stable for rapid intervention in emergencies

200L Emulsifier Tank : Made of epoxy steel, robust and resistant, ensuring a long lifespan.

Dual Feed System : Equipped with SYM/DSP65 fittings for a reliable connection

Manual Monitor nozzle: Flow rate of 2000 l/min at 7 bar, ideal for significant fires

Foam Injection : Fixed injection percentage at 3%.

Side Storage : Includes two hose boxes with four DN70 hoses of 20m each.

Enhanced Stability : Four stabilizing legs for safe use.

RAL3000 Red Paint : Increased visibility in emergency situations.

Dimensions : 2370 x 1235 x 1255 mm.

Weight : 435 kg

Ideal for fire services, rescue operations, and industrial emergency situations, this mobile foam unit is a major asset for a rapid and effective response.

### Caractéristiques

- Power : 2 X DN70
- Dimensions : 2370 x 1235 x 1255 mm
- Weight : 435 kg
- Flow : 2000 L/MIN
- Capacity : 200L
