PETZL double lanyard for climbing and mountaineering

Description

Designed for climbing and mountaineering, the DUAL CONNECT ADJUST lanyard is an adjustable double retaining lanyard for belaying and abseiling. The adjustable strand allows you to adjust the length best suited to your manipulations.
Carabiners are facilitated by the connector being held in the correct position by a rubber ring that can be adjusted with one hand and attached to the belay ring by a simple lark's head.

Certification(s): CE, UKCA, UIAA 109
