Fall arrest kit for aerial work plateform

Description

This kit includes:
- A fall arrest harness
- A single restraint lanyard with 2 screw connectors
- A carry bag

The fall arrest harness has 2 dorsal attachment points.
The main polyester straps are 44 mm wide (strength greater than 27 kN).
It is equipped with a fall-arrest attachment point.
When not in use, the extension strap can be held in place on a shoulder strap by means of Velcro tape.
It also features a large black polypropylene back plate.

The 10.5 mm diameter sheathed polyamide lanyard is ideal for restraint during work. It is easy to use and has no adjustment system.
The lanyard without connectors measures 1.3 metres.
It has a static strength of over 22 kN.
The lanyard must be connected to the nacelle anchoring point provided by the nacelle manufacturer. This lanyard is not considered a fall arrester.

The lanyard is supplied with 2 zinc-plated steel screw connectors with an 18 mm opening.

The 600D polyester triangle carry bag features adjustable hook-and-loop straps, a zipped main compartment and a zipped front pocket.

Fall arrest harness standards:
EN 361 - Personal protective equipment against falls from a height: Fall arrest harness
Tested for 140 kg

Lanyard and connector standards:
EN 354 - Personal protective equipment against falls from a height: Lanyards
EN 362 - Personal protective equipment against falls from a height: Connectors
