Guide line

Description

The guide line is an essential communication tool for field operations, particularly for firefighting operations in confined spaces. It enables firefighters to move safely along a defined route.

Made of 6 mm braided rope with a strength > 600 daN.

It also features progress markers in three colors: green, yellow and red, and 4 beads every 2.5 meters.

Its retroreflective thread and 14 mm diameter fluorescent beads ensure high visibility even in dark conditions.

Complies with GNR regulations

Caractéristiques

- Poids ligne 50 m : 1.05 kg
- Poids ligne 60 m : 1.3 kg
