Description

The VFR EVO firefighter helmet is equipped with a transparent bezel and a reflective gold facial visor certified to European standards EN 166: 2004 and EN 14458: 2004, and is broken down as follows:

- Outer shell
- Adjustable chinstrap
- Adjustable chin strap
- Adjustable mesh chin cup
- Size adjustment wheel
- Internal shock absorber
- External headpiece levers
- SCBA mask attachment kit

All components are detachable and replaceable.

EN 443:2008 (Fire protection helmets for buildings and other structures)

EN 16471:2014 (Helmets for fighting forest fires)

EN 16473:2014 (Helmets for technical rescue)

MED

Shell

Made of fiberglass-reinforced thermoplastic material, resistant to high temperatures and mechanical stress. It provides high multidirectional protection for the wearer's head, including the skull, nape of the neck, frontal region and temporal and auricular surfaces. The shape of the skullcap is enveloping, with a longitudinal rib with rounded edges (crest), which is thinner at the back and ends by flaring out at the front. Transversely to the horizontal axis, another rib converges with the crest in the helmet's median zone.

At the rear, the rounded edge facilitates water drainage. On the sides, a universal connection system enables the attachment of lighting devices and breathing masks.

Colors: red, yellow, white, blue, black, orange.

Options: fluorescent yellow, fluorescent orange, photoluminescent and chrome-metal gray.

Chinstrap

4-point adjustable chinstrap with quick-release buckle.

Adjustable leather chinstrap.

Adjustable mesh chinstrap

4-point adjustable mesh suspension straps with leather edges.

Size adjustment system

Multi-size headband adjustment knob (52 - 64).

Comfort elements

Fireproof, made of leather.

Weight

Helmet alone: 1,220 gr +/- 10 gr
