VFR EVO Firefighting Protection Helmet - Multi-Standard Firefighter Helmet

Description

The VFR EVO firefighting helmet is designed for firefighting operations, technical rescue, and hazardous environments. Robust, ergonomic, and modular, it provides full head protection while ensuring excellent wearing comfort.

It features a clear visor and a gold reflective face shield, offering effective protection against heat, impacts, and splashes.

Main applications

- Structural firefighting
- Wildland firefighting operations
- Technical rescue and emergency operations
- Use with self-contained breathing apparatus (SCBA)

Certifications

- EN 443:2008 - Firefighting helmets for buildings
- EN 16471:2014 - Wildland firefighting helmets
- EN 16473:2014 - Technical rescue helmets
- EN 166:2004 - Eye protection
- EN 14458:2004 - Face shield
- MED - Marine equipment compliance

Design and protection

The shell is made of glass-fiber reinforced thermoplastic, ensuring high resistance to heat and mechanical impact. Its enveloping shape provides full head protection, including skull, neck, temples, and frontal areas. The helmet is designed with integrated mounting systems for communication devices, lighting, and respiratory masks.

Equipment

- Integrated clear visor
- Gold reflective face shield

- 4-point quick-release chin strap
- Adjustable leather chin guard
- Mesh inner suspension system
- Size adjustment dial (52-64)
- Internal shock absorber
- SCBA mask mounting kit

Weight

- Helmet only: 1,220 g
- Helmet with visor and face protection: 1,540 g

The VFR EVO helmet is a certified, versatile firefighting solution designed to deliver protection, modularity, and reliability in demanding operational environments.

Caractéristiques

- Weight : Casque seul : 1 220 g
- Tailles : Molette de réglage (tailles 52-64)
