Textile intervention gloves for fire-fighters

Description

The high-performance Firefighter glove Top Rescue with top- and palmhand made of silicone coated Aramid assures a perfect grip while remaining flexible and permitting highest dexterity. Gathered padding in the finger area ensures best cushioning and extra heat protection. There is also a metal hook and ring to attach the gloves to each other or the fireman gear.

The cuff is made of fire resistant Nomex.

The adjustable wrist strap provides best fit.

Precurved fingers for perfect grip and dexterity.

A breathable and waterproof membrane additionally protects against the penetration of moisture and the chemicals required by EN 659.

Reflective strips ensure best visibility.

Washable at 60 °C.

Complies with EN 659 (2003) + A1: 2008 standards.
