Comfortable helmet for working at height or on the ground

Description

For work at height or on the ground, the VERTEX helmet combines comfort and safety. It protects against the many hazards present in the field.
Great comfort with :
 A six-point textile headband for a comfortable, natural fit to the contours of the head.
 CENTERFIT adjustment with two side adjustment knobs to center the helmet correctly.
 The FLIP&FIT system, ideal for positioning the headband at the bottom of the helmet to accentuate the fit. It can be retracted into the helmet to simplify storage and transportation.
Standard interchangeable comfort foam is also supplied.

The right protection for working at height or on the ground:
 A DUAL chinstrap, to adjust resistance according to the type of work to be carried out: working at height (EN 12492) or working on the ground (EN 397). Thanks to the repositionable clip, you can switch from "high resistance" to "reduced resistance" and vice versa, as required.
 A closed outer shell to protect against field hazards (molten metal splashes, flames, electrical hazards...) and deformable to absorb shocks.

Need to add accessories to maximize safety in the field? The following equipment is available on request: protective visors, headlamps, dirt guards, neck protectors, badge holders and hearing protection.
The helmet is available in 7 colors and two high-visibility versions.
