Description

The Falcon harness from Petzl is the perfect safety device for suspended work. This ultra-lightweight piece of equipment can accompany you on even the most delicate jobs. Its perfectly optimized design offers numerous advantages in the field.

Thanks to its ventral attachment point, weight is optimally balanced. The load is distributed between the waistband and the thighs, making it easy to work at height.

Cushioned 3D foam at the waistband and thighs maximizes comfort during operations. Textile attachment points on the sides also help to reduce bulk.

DOUBLEBACK PLUS self-locking buckles on the waistband and FAST LT buckles on the thighs: the Falcon harness's ergonomics are highly appreciated. At the rear, the metal buckle is used to install a TOP or TOP CROLL L torso. Two rigid equipment loops at the front and three more flexible loops at the rear allow easy access to work equipment, without getting in the way during operations. To complete the harness optimization, there are also two CARITOOL tool-holder loops.

The harness has a ventral attachment point and a rear attachment point on the waistband, plus others on the sides.

Caractéristiques

- Weight : 915 grammes pour la taille 1
- Materials : polyamide, polyester, aluminium
- Certifications : CE EN 813, CE EN 358, UKCA, EAC, ASTM F1772
