The Petzl Reverso belayer, the versatile, lightweight and durable equipment for belaying yourself and others in outdoor climbing

Description

For cliff climbing, long routes and mountaineering, Petzl's Reverso belay device combines safety and versatility. It can be used to belay a leader, abseil and belay one or two seconds.

Easy to use

- Classic movements for use with the rope in the belay device and the other hand on the braking side of the rope.
- Natural sliding of the rope in the belayer
- V-shaped braking grooves and asymmetrical lateral grooves to modulate braking control

A single piece of equipment for all uses

- Use on long routes, cliffs, mountaineering
- Normal mode for belaying a climber or abseiling (on one or two ropes)
- Independent and simultaneous belaying of two seconds in Reverso mode
- Release hole for slackening the second climber via a carabiner

A lightweight, ultra-sturdy belayer

- Lightweight (57 grams)
- Long-lasting stability thanks to hot-forged aluminum and rounded rope passage design
- Efficient braking on double ropes from 7.1 to 9.2 mm and twin ropes from 6.9 to 9.2 mm, and on single ropes between 8.5 and 10.5 mm

Caractéristiques

- Materials : corps en aluminium
- Certifications : EN 15151-2, UIAA
