

Petzl RIG Descender

https://www.securhit.com/en/belay-and-descenders/472-473-descendeur-petzl-rig.html#/435-couleur_d021aa-jaune

Versatile, compact and wear-resistant self-braking PETZL descender, specially designed for difficult access. For experienced climbers only.

Description

For experienced rope climbers, the PETZL RIG descender is the ideal piece of personal protective equipment. It's the equipment of choice for preventing falls from heights in any environment. It ensures maximum safety, even in the most inaccessible places.

Ease of use:

- Locking latch on the movable flange for one-handed rope insertion without losing the descender.
- Guide and markings to simplify rope installation
- Ergonomic handle for perfect control during descent
- Descends on the flange or in the V-shaped braking groove
- AUTO-LOCK system for quick positioning at the workstation, with rope locking once the handle is released (automatic rope return to prevent accidental snagging)
- Direct storage of the handle once the rope has been removed from the descender

Between innovation and safety

- Rope cleaning (if jammed) without handle manipulation
- Pivoting cam for easy rope slack take-up and reversibility of hauling system
- Reinforced rope friction zone for long-lasting wear resistance
- Compatible with rope diameters from 10 to 11.5 mm

Caractéristiques

- Weight : 400 g

- Materials : Aluminium, acier, polyamide
- Maximum working load : 200 kg
