

PETZL AM'D CARABINER

https://www.securhit.com/en/mousquetons-et-connecteurs/475-480-mousqueton-petzl-am-d.html#/442-modele_m34a-ball_lock_gris Lightweight, asymmetrical D-shaped carabiner with automatic TRIACT-LOCK and BALL-LOCK systems, and manual SCREW-LOCK system for connecting various types of equipment.

Description

A reliable connection between various pieces of equipment requires a high-quality device like the PETZL AM'D carabiner. It brings safety and versatility to operations at height, whatever the environment.

Everyday practicality:

- D-shaped design ideal for connecting descenders or lanyards
- Lightweight, ultra-strong aluminum material maximizes safety and reduces the weight of the professional's equipment when working at height.
- Can be combined with the CAPTIV barrette to increase the carabiner's load on the long axis, reduce the risk of overturning, and ensure a solid connection with every piece of equipment

Simplified handling:

- Smooth design on the inside to minimize the risk of stable points and allow easier rotation of the carabiner
- Keylock system prevents accidental snagging

H-shaped structure:

- Uncompromising strength combined with light weight
- Markings protected against friction

Three types of locking :

- TRIACT-LOCK: automatic triple-action opening lock
- BALL-LOCK: automatic triple-action opening + locking indicator
- SCREW-LOCK: manual screw lock + red visual indicator if carabiner is not closed

The TRIACT-LOCK and SCREW-LOCK models are available in black, while the TRIACT-LOCK and BALL-LOCK versions are also available in gold.

Caractéristiques

- Résistance grand axe : 27 kN
- Résistance petit axe : 8 kN
- Résistance doigt ouvert : 7 kN
