Ultra-lightweight PETZL SM'D compact asymmetrical aluminum carabiner with TRIACT-LOCK automatic locking system, SCREW-LOCK manual locking system or without locking system.

Description

For working at height, PETZL's compact, asymmetrical SM'D carabiner combines practicality and efficiency. Thanks to its many advantages, it can be safely connected to a variety of devices.
- D-shaped design, combining good finger opening and high strength
- An aluminum design, a material appreciated for its lightness
- An interior design designed to limit the risk of stable points and ensure optimal rotation
- Keylock system to prevent accidental snagging of the carabiner
- H-shaped profile to optimize size and weight/resistance ratio
- An ideal hole for connecting devices such as the TIBLOC or MICRO TRAXION and preventing their loss
- Three types of closure: TRIACT-LOCK (automatic triple-action opening lock), SCREW-LOCK (manual screw lock with red visual indicator if carabiner is not closed) or without locking device
- Weight: between 40 and 55 grams depending on model
SM'D carabiners are available in yellow or black, depending on the model.

Caractéristiques

- Material : Aluminium
