JAG SYSTEM reeving kit designed by PETZL for climbing and mountaineering rescue situations. A compact, ready-to-use system.

Description

PETZL's JAG SYSTEM reeving kit is an indispensable device for reeling in a climbing companion in a complex situation, such as a crevasse fall. It can also be used for work at height. Ready to use, it can be used for quick hauling operations.

Appreciable versatility:

- It can be used for mobile anchoring, tensioning a system or freeing an injured person.
- Can be coupled with PETZL's I'D descender to create a reversible rescue kit.

High efficiency:

- 4:1 reduction and high performance pulleys on sealed ball bearings to divide user effort by four
- Available in three lengths (1, 2 and 5 meters) for use even when the distance to the anchor is short

Easy to use:

- A reeving kit in a flexible sheath to prevent potential entanglement
- Yellow color at the end of the sleeve to identify the reeving head at a glance
- Connectors attached to the ends of the sheath to make clipping easier

The PETZL JAG SYSTEM rigging kit comes with two Am'D TRIACT-LOCK carabiners.

Length deployed / folded / weight: 1 m / 0.32 m / 610 g, 2 m / 0.34 m / 805 g, 5 m / 0.40 m / 1460 g

Working load: 6 kN
Breaking load: 16 kN

Caractéristiques

- Materials : aluminium, polyamide, polyuréthane
- Certifications : CE EN 358, UKCA, EAC
- Diamètre de corde : 8 mm
