High-visibility, comfortable, modular VERTEX VENT PETZL HI-VIZ helmet with six-point textile cap. For day and night work, at heights or on the ground.

Description

The PETZL VERTEX VENT HI-VIZ helmet combines reliability, practicality and comfort for work and rescue operations at height or on the ground. Thanks to this top-of-the-range personal protective equipment, you'll be safe when working in the dark.
A helmet that's comfortable to wear
- Six-point textile headband for improved ergonomics
- Two side adjustment knobs (CENTERFIT adjustment) to center the PPE on the head.
- The retractable FLIP&FIT system places the headband directly in the lowered position (helmet held in place perfectly over time).
- Standard interchangeable comfort foam
Everyday safety
- A rigid outer shell that can be deformed in the event of falling objects or a collision
- A DUAL chinstrap for resistance that's totally adapted to the situation: at height (EN 12492) or on the ground (EN 397)
- Two possible modes for the chinstrap clip: "high resistance" (optimum helmet retention in the event of a fall) or "low resistance" (no strangulation in the event of helmet snagging)
- Ventilation holes with sliding flaps to regulate ventilation
- Fluorescent tints with phosphorescent clips and reflective strips to ensure visibility in the dark.
VERTEX VENT HI-VIZ helmet accessories
Helmet accessories to complete protection: protective visor, hearing protection, PETZL headlamp, stain protection, neck protector, badge holder.
