STRATO HI-VIZ PETZL helmet, robust, lightweight and high-visibility. Suitable for working at heights and on the ground, day and night.

Description

Whatever the working environment, good head protection is essential. PETZL's STRATO VENT HI-VIZ helmet combines lightness, high visibility and robustness to avoid any risk of impact. An ideal piece of equipment for operations at night or in dark places.
Ideal design:
- An inner shell made from two main materials, EPP (expanded polypropylene) and EPS (expanded polystyrene), for appreciable lightness and great strength.
- CENTERFIT adjustment for optimum centering of the helmet on the head (via two side adjustment knobs)
- FLIP&FIT system for low headband position (secure fit)
- Replaceable comfort foams supplied with the helmet

Foolproof reliability:
- DUAL chinstrap allows helmet resistance to be adjusted to suit the environment: working at height (EN 12492) or on the ground (EN 397)
- A clip with two modes: "high resistance" or "low resistance".
- A closed, hard but deformable outer shell to absorb shocks
- Guaranteed protection against electrical hazards, molten metal splashes and flames
- Fluorescent tint with phosphorescent clips and reflective strips for excellent visibility, even in the dark

Optional accessories
Need to increase safety on high-risk worksites? The PETZL STRATO HI-VIZ helmet can be fitted with a protective visor, hearing protection, PETZL headlamp, dirt protection, neck protector and badge holder.

Caractéristiques

- Weight : 445 g
- Materials : ABS (acrylonitrile butadiène styrène), EPP (polypropylène expansé), EPS (polystyrène expansé), polyamide, polycarbonate, polyester haute ténacité, polyéthylène
- Tour de tête : 53-63 cm
